IN THE ABSTRACT

Please replace the Abstract in the present application with the following new Abstract:

ABSTRACT OF THE DISCLOSURE

A method for reordering a decode order into a display order of an image. A method of obtaining a compressed picture sequence includes determining if a first picture of the compressed picture sequence is an I-picture, a B-picture or a P-picture; if the first picture is an I-picture, decoding the first picture and storing a decoded first picture into a first buffer; obtaining a first virtual picture according to a predetermined manner and sending the first virtual picture to a second buffer for display.
